

STAY SAFE

To properly and legally dispose of sharps / needles, **DO THE FOLLOWING:**

- 😊 **DO** use only an approved sharps container for sharps disposal.
- 😊 **DO** obtain an approved container or create your own alternative approved container (e.g. bleach or detergent container) to place your sharps before transport & disposal.
- 😊 **DO** place a secure lid on the sharps container.
- 😊 **DO** check with your HHW Program to verify Home-Generated Sharps Collection sites.
- 😊 **DO** ask your local HHW Program for clarification on sharps / needles management and disposal, if necessary.
- 😊 **DO** place biohazardous waste labels on both sides of sharps container.

ALWAYS
use an approved
sharps container

YOUR GUIDE TO SHARPS DISPOSAL

Use CAUTION with Sharps / Needles!

Sharps / needles can injure people, can spread disease (hepatitis and HIV/AIDS), damage recycling equipment, and the effects are long term. **YOU HAVE THE POWER** to prevent a situation like this simply by safely disposing of your used sharps. Do not place others at risk when safe alternatives are currently available.

**To avoid needle sticks at home,
DON'T DO THE FOLLOWING:**

- 😱 **DON'T** throw used sharps / needles, syringes, or lancets in the garbage / trash, whether at home or away from home.
- 😱 **DON'T** put sharps / needles in recycling containers.
- 😱 **DON'T** flush sharps / needles down the toilet.
- 😱 **DON'T** put sharps / needles into used plastic milk jugs, coffee cans, plastic bags, glass bottles or soda bottles.
- 😱 **DON'T** handle someone else's sharps / needles.
- 😱 **DON'T** overfill sharps containers ($\frac{3}{4}$ full is max).
- 😱 **DON'T** place non-sharps items in your sharps containers (pills, wound dressings, surgical instruments and other large metal parts, hard, heavy plastics, glass, fabric, thermometers, test strips, liquid medications).

How to Safely Dispose Sharps

San Bernardino County residents can now safely dispose of their used Sharps in a 2 gallon or smaller, heavy-duty, plastic container as an alternative to plastic bio-hazard sharps containers at participating Household Hazardous Waste Collection facilities.

Containers should only contain needles, lancets, and syringes with a needle attached that must be completely spent (no liquid remaining, including EpiPens).

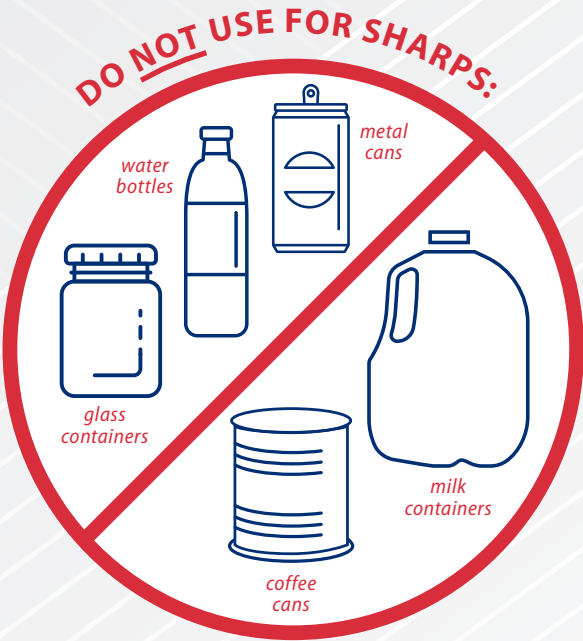

How To Create your Own Container:

- Place sharps into an Approved Sharps Container or 2 gallon or smaller heavy-duty plastic container
- Made of thick plastic (e.g. bleach or detergent container)
- Do not use food product containers
- Must have a screw-top and puncture resistant lid
- 2 gallons or less
- Leak-resistant
- Remain upright when standing
- Place printed Bio-Hazard Label on both sides
- When ¾ filled, secure lid, and tape the container closed
- Sharps containers shall be taken to a participating HHW facility for disposal. DO NOT place in the trash.

Print **FREE** labels by visiting sbcfire.org/hhw

Preprinted labels are available at HHW collection facilities

Disposing of Sharps / Needles

Per California State Law, it is illegal to dispose of sharps / needles in the trash, recycling bin or composting bins.

Traveling With Sharps / Needles

Never place used sharps / needles in the trash on airplanes, in hotel rooms, or in public restrooms.
